

**UNITED STATES OF AMERICA
DEPARTMENT OF TRANSPORTATION
OFFICE OF THE SECRETARY
WASHINGTON, D.C.**

Issued by the Department of Transportation
on the 31st day of March, 2020

**CONTINUATION OF CERTAIN AIR
SERVICE**

Docket DOT-OST-2020-0037

**Under Public Law 116-136 §§ 4005 and
4114(b)**

ORDER TO SHOW CAUSE

I. SUMMARY

By this Order, the U.S. Department of Transportation (the Department) is proposing parameters for initially implementing the authority granted to the Secretary of Transportation (the Secretary) by Sections 4005 and 4114(b) of the Coronavirus Aid, Recovery, and Economic Security Act (the CARES Act). As detailed further below, the order proposes that air carriers receiving financial assistance under the CARES Act maintain minimum air services on a nationwide basis, with some exceptions.

II. BACKGROUND

On March 27, 2020, the President signed the CARES Act into law. Sections 4005 and 4114(b) of that act authorize the Secretary to require, “to the extent reasonable and practicable,” an air carrier receiving financial assistance under the CARES Act to maintain scheduled air transportation service as the Secretary deems necessary to ensure services to any point served by that carrier before March 1, 2020 (Service Obligation). The Department here is proposing parameters for how it will implement the Service Obligation initially. The parameters include provisions for extending the Service Obligation or imposing a new or different Service Obligation in the future, if the Secretary deems it to be necessary. The Department invites comments on this proposal.

III. COVERED CARRIERS

Passenger air carriers and all-cargo carriers are eligible for financial assistance under the CARES Act.¹ The Department tentatively determines that the Service Obligation under Sections 4005 and 4114(b) will apply to a subset of air carriers under 49 U.S.C. 40102, which is the definition cited in the CARES Act. The Department proposes that the Service Obligation will apply to

¹ Public Law No. 116-XX, §§ 4003(b)(1)-(2), and 4112(a)(1)-(2).

direct air carriers accepting financial assistance under the CARES Act that hold certificates of public convenience and necessity for scheduled passenger air transportation pursuant to 49 U.S.C. §§ 41101 - 41102 or that hold a Commuter Air Carrier Authorization pursuant to 14 C.F.R. Part 298 (covered carriers). Because they operate largely on an on-demand basis, the Department has tentatively decided to exclude carriers with certificates of public convenience and necessity for charter operations and air taxi operators registered under 14 C.F.R. Part 298 from Service Obligation under Sections 4005 and 4114(b).

The Department also tentatively determines that all-cargo operators that hold certificates of public convenience and necessity to provide air transportation pursuant to 49 U.S.C. § 41101 and 41103 accepting financial assistance under the CARES Act are also subject to the Service Obligation under Sections 4005 and 4114(b), but will enforce that obligation differently as described below.

IV. COVERED POINTS

The Department tentatively determines that the Service Obligation under Sections 4005 and 4114(b) will pertain to only U.S. points. On March 19, 2020, the U.S. Department of State issued a global Level 4 Health Advisory urging all U.S. citizens to avoid all international travel.² The Department, therefore, tentatively determines not to require covered carriers to serve international points, at least during the duration of the Health Advisory.

In addition, because Sections 4005 and 4114(b) refer to “services to any point” as distinguished from “airports,” the Department has determined that, in cases where multiple airports serve the same point, carriers would not need to maintain service to all such airports, but would be able to consolidate operations at a single airport serving the point.

Sections 4005 and 4114(b) also state that the Service Obligation pertains to any point served by covered carriers before March 1, 2020. The Department intends to use Official Airline Guide (OAG) schedule data combined with T100 traffic data as reported to the Department as the primary data sources for determining the points that covered carriers served prior to March 1, 2020. The Department tentatively determines that it will use week-ended February 29, 2020 OAG schedule data as the primary source and year-ended December 31, 2019 T100 data combined with year-ended December 31, 2019 OAG data as a supplementary source to determine the list of points served by covered carriers.³ The Department has attached, as Appendix A, a description of the methodology used, and, as Appendix B, a tentative list of points served by each potentially covered carrier. If any interested party believes there are discrepancies in this list, they are invited to advise the Department in response to this Order.

V. SERVICE LEVELS

The Department recognizes that demand for air travel has significantly declined as a result of the COVID-19 public health emergency and that requiring covered carriers to operate their full

² See <https://travel.state.gov/content/travel/en/traveladvisories/ea/travel-advisory-alert-global-level-4-health-advisory-issue.html> (Accessed March 26, 2020).

³ Due to the time-lag in T100 operational data, this is the most recent period for which complete data is available.

schedules and networks as they did before the public health emergency would be counterproductive to the objectives set forth in the CARES Act. Therefore, the Department has tentatively determined to implement covered carriers' Service Obligation by requiring only minimum service levels for each point served as follows. For points that a covered carrier served with at least one flight at least five days per week, the covered carrier would need to provide at least one flight per day, five days per week, for that point.⁴ For a point that received service from a covered carrier fewer than five days per week, the covered carrier would only need to serve that point with at least one flight on one day per week. Additionally, if a covered carrier served a point with any degree of scheduled service from more than one other point, it would only need to provide service from that point to one of the previously served points as long as it meets the above frequency requirements. A covered carrier can meet its minimum Service Obligation for a given point by dividing its flights across multiple cities, if it so chooses. If multiple covered carriers served a point, each covered carrier would be required to serve the point in accordance with the above minimum service levels, regardless of the service decisions made by the other covered carriers serving that point. These provisions do not authorize any coordination among air carriers that would violate the antitrust laws.

The Department recognizes that even with these reduced service levels, it may not be practicable for covered carriers to serve all points previously served in the prevailing operating environment. Likewise, points that may make practical sense to serve now, may not at a later date. Sections 4005 and 4114(b) also provide the Secretary with discretion to determine whether the Service Obligation is reasonable or practicable. Therefore, the Department tentatively determines to allow covered carriers, at any time for the duration of their Service Obligation, to request that points be exempted from their Service Obligation. Covered carriers should submit a list of points that they believe are not reasonable or practicable to serve and explain why service is not reasonable or practicable.⁵ The Department will inform covered carriers of its decision in a timely manner.

For regional carriers, the Department tentatively determines to interpret any Service Obligation to apply to the marketing carrier. If a regional covered carrier holds out services under its own airline designator code, it will be the marketing carrier and be responsible for maintaining service at the above service levels. Regional operations operating as a franchise of a mainline carrier will be the responsibility of the mainline carrier as the flights of regional carriers operating for mainline carriers are under the commercial control of the mainline affiliate that schedules, prices, sells, and revenue manages the flight. If a regional covered carrier receives assistance under the CARES Act, its Service Obligation will be considered met if it is operating all flights designated by its mainline affiliate, consistent with the mainline carrier's Service Obligation. This proposal would not alter any flexibility that mainline carriers have in their

⁴ For example, if a carrier operated seven flights per day, seven days per week to a given point, it would only be required to operate one flight per day, five days per week.

⁵ Such submissions should be made to the Director, Office of Aviation Analysis.

contracts to allocate capacity within their networks. Each mainline carrier may select any regional affiliate that the mainline carrier sees fit to operate flights to covered points.

In contrast to passenger demand, all-cargo services appear to be in greater demand as a result of the COVID-19 public health emergency, due in part to the dramatic decline in belly cargo capacity resulting from the cancellation of scheduled passenger flights. We also recognize that all-cargo operators need maximum operational flexibility to respond to changes in cargo flows, especially when responding to the needs of a public health emergency. Most all-cargo carriers do not publish schedules, and many operations occur on an ad-hoc basis. We expect that all-cargo operators will see comparably stronger demand for the duration of the public health emergency. Therefore, the Department tentatively determines not to impose an a priori Service Obligation on all-cargo carriers. However, we tentatively determine that all-cargo carriers receiving assistance under the Act remain covered, and the Department may impose a Service Obligation if it determines it is appropriate, including if it is necessary to maintain well-functioning health care and pharmaceutical supply chains, including for medical devices and supplies, as directed by the CARES Act.

Finally, nothing in this order should be construed as affecting the obligations of carriers operating under an Essential Air Service contract or the rights of communities eligible for Essential Air Service.

VI. REPORTING

The Department tentatively determines that covered carriers accepting financial assistance under the CARES Act, and therefore obligated to provide certain air services, must certify to the Department, on a monthly basis, that they operated service in accordance with their obligations.⁶ Each carrier must identify and explain any points that did not receive service to the minimum service levels established by a final order issued in this proceeding.

VII. DURATION

The Department tentatively determines that the Service Obligation imposed under this Order will extend through September 30, 2020.⁷ The Department tentatively chose this date for the initial term of the Service Obligation because carriers accepting financial assistance under the CARES Act must maintain certain levels of employment until that date.⁸ If the Department finds that it is necessary to extend the Service Obligation, it intends to notify covered carriers of any extension no later than August 1, 2020. If at any time during the effective period of the Department's authority under the CARES Act the Department finds that it is necessary to impose a new

⁶ Certifications should be submitted to the Director, Office of Aviation Analysis.

⁷ The Secretary's authority granted under Sections 4005 and 4114(b) of the CARES Act extends through March 1, 2022.

⁸ Public Law No. 116-136 §§ 4003(c)(2)(G) and 4114(a)(1).

Service Obligation, the Department intends to provide covered carriers with as much advance notice as possible.

ACCORDINGLY:

1. The Department directs all interested persons to show cause why the Department should not issue an order making final its tentative findings and conclusions discussed herein. Objections or comments to the tentative findings and conclusions in this Order are due no later than two (2) business days from the service date of this Order and be served on all interested parties as required by the Department's procedural rules.⁹ In the event that no objections are filed, all further procedural steps shall be deemed waived, and the Department may enter an order making final its tentative findings and conclusions;
2. The Department tentatively determines that the Service Obligation contained in Sections 4005 and 4114(b) apply to air carriers (covered carriers) accepting financial assistance under the CARES Act and that either (a) hold a certificate of public convenience and necessity for scheduled passenger air transportation pursuant to 49 U.S.C. §§ 41101 and 41102 or a Commuter Air Carrier Authorization pursuant to 14 C.F.R. 298, or (b) provide all-cargo air transportation pursuant to 49 U.S.C. § 41101 and 41103. This provision does not apply to charter air transportation or registered air taxis;
3. The Department tentatively determines that it will use Official Airline Guide (OAG) data for the week ended February 29, 2020, supplemented with T100 traffic data combined with OAG data for the year-ended December 31, 2019, to determine those points served by covered carriers identified in ordering paragraph 2 that are subject to the Service Obligation, as set out in the Appendix to this Order;
4. The Department tentatively determines that covered carriers identified in paragraph 2 must provide minimum levels of service, as described in the body of this order, to those points identified in paragraph 3. Covered carriers may at any time request an exemption from their Service Obligation for certain points under the procedures described in the body of this order;
5. The Department tentatively determines that covered carriers identified in paragraph 2 must provide monthly certifications to the Department of their compliance with their Service Obligation as described in the body of this order;¹⁰

⁹ 14 C.F.R. Part 302.

¹⁰ Covered carriers should make every effort to comply in a timely fashion with existing reporting obligations imposed by Departmental regulations, including reporting of T-100 traffic data.

6. The Department tentatively determines that the Service Obligation proposed in this Show Cause Order will terminate on September 30, 2020, unless otherwise extended by order of the Department.

Methodology for Determining Covered Points

To determine the list of covered points and the carriers that provided service to them prior to March 1, 2020, the Department used two data sets: Official Airline Guide (OAG) schedule data and T100 operational data. OAG schedule data is a third-party product, while T100 is collected and controlled by the Department (14 C.F.R. Part 241.19-5) T100 is reported on a monthly basis by operating carrier while OAG schedule data provides daily granularity and includes both the operating and marketing carrier information. OAG schedule data represents planned operations as filed with OAG by carriers, while T100 data represents actual operations filed by carriers with the Department. The data between the two datasets is not directly comparable. There are many more records in the T100 operational data than the OAG schedule data once they are aggregated to a common level of detail. For example, a marketing carrier may swap between two regional franchise carriers (the operating carrier) in a market. Such last minute operational swaps are often not reflected in the planned schedule data but is reported in the operated T100 data.

The Department applied the following methodology to the data to determine the list of covered points, the carriers that served those points, the average weekly frequencies from the T100, and actual frequencies from the OAG Schedule data for the week ended February, 29, 2020. The Department first calculated average weekly outbound departures by operating carrier for each domestic U.S. point from the T100 and combined this with calculated average weekly outbound departures by operating and marketing carrier for each domestic U.S. point from published OAG schedule data and combined this with the week ended February, 29, 2020 OAG schedule data to determine the universe of covered points and operating carrier departures for each marketing carrier. For each covered point, the Department then examined daily outbound frequencies for the week ended February 29, 2020 to determine each point's actual frequencies for that week. In the event the week ended February 29, 2020 schedule data did not have a point and operating carrier combination that was in the T100, the T100 was used. There are also many points where a franchise operating carrier operates for more than one marketing carrier. In this circumstance, the T100 was allocated to each marketing carrier code based on the share of the operating carrier departures for each marketing carrier from the OAG schedule data for each point where this occurred. This analysis resulted in 3,540 point/carrier combinations with service at least once per week. 592 points and 54 carriers are potentially covered by the minimum Service Obligation.

Summary Tables

	2/23 - 2/29 Weekly Frequency Counts	T100 CY2019 Avg Weekly Departures
In OAG and T100	164,654	161,583
